

# Statistical Machine Learning Approaches to Liver Disease Prediction

TEAM ID: PNT2022TMID26382

## PROJECT STRUCTURE

- We have main folders Flask which has pycache, dataset, static, templates, training.
- Dataset has dataset indian\_liver\_patient.csv.
- A python file called pycache for server side scripting.
- We need the model which is saved and the saved model in this content is liver\_analysis.pkl.
- Templates folder which contains index.html and result.html.
- Training folder has Liver\_disease.ipynb where the model is created and saved.
- Static folder contains css(styling), images, folders to enhance the features of the web page.
